

CARPET CLEANING - Chem-Dry Central

If you are perfectly happy with your furniture and flooring perhaps all that is needed to brighten up everything is a general spruce up? It is surprising how much smarter one's home can look if the carpets and upholstery get the occasional professional clean and nothing compares with the results obtained by a dedicated cleaning company.

Carpets cleaned the Chem-Dry way are left sparkling clean and dry in one to two hours! Sue Collin of Chem-Dry Central explained how their Dry Cleaning service doesn't involve any harsh cleaning agents and requires so little liquid the carpets are dry again in no time. As a bonus, the carpet stays clean for longer as there are no sticky residues left behind to attract more dirt. Sue told us, "We do not use soaps; instead we employ a carbonation solution."

The amazing cleaning power of carbonating solutions creates a powerful reaction that deep cleans carpets in a safe and gentle way... and, because the bubbles do the work for us, the Chem-Dry carpet cleaning system does not need to use gallons of soapy cleaning chemicals. Soapy residues attract dirt like a magnet, causing your carpet to get dirty again very quickly. Steam carpet cleaners use gallons of water and high pressure, which drive dirt and moisture down into your carpet's backing and underlay. This may result in

longer drying times which can create a breeding Ground for mould and bacteria and reappearing spots caused by dirt "wicking" up the carpet fibres as the carpet dries.

Upholstery, whether it is leather or fabric, can enjoy the same revitalisation as your carpets. If your treasured suite is getting a bit old and stained or you simply want to revitalize the colour, then Chem-Dry is your Solution. A proper, thorough clean by Chem-dry Central can freshen and restore your upholstery and add to the life of suite.
